Amphenol Corporation is a major producer of electronic and fiber optic connectors, antennas, cable and interconnect systems such as coaxial cables. The division Amphenol Antenna Solutions was founded with the singular focus of designing and manufacturing high performance base station antennas for cellular and public safety networks. Today, the company is a single source for wireless infrastructure offering not only base station antennas, but also transmission line products including RF cable, connectors and jumpers as well as accessories (TMAs, combiners, filters, couplers, repeaters) and RET system components (surge arrestors, Bias-Ts and PDUs). The company provides a comprehensive suite of solutions for virtually all applications and global frequencies, with product available from the top of the tower to the base station.

www.btechinc.com

BTECH provides battery monitoring and management systems for critical backup power systems. BTECH is the exclusive supplier of battery monitoring systems to the Los Angeles Regional Interoperable Communications System (LA-RICS). We assure that the batteries in critical backup power systems will perform during a power outage. Whether it is generator start batteries, a remote radio site, or a large UPS system for a central command and control center, BTECH has a cost effective battery monitoring system to fit the application. All BTECH systems can be remotely monitored at a central location – eliminating the need for expensive manual testing and maintenance.

ITI is a fully licensed General Contractor and national tower engineering company. ITI designs, builds, installs, integrates and maintains communications infrastructure. ITI performs all structural and electrical engineering, and designs towers to EIA/TIA 222G standards. Site grounding, fencing and shelters are designed to the FAA -019e and R56 standards. ITI employs crews with test equipment and tools to complete the design, build, installation, integration, test, and maintenance of tower sites. ITI staff have completed background investigations, most hold DHS security clearances. Current projects include First Net (LA-RICS), and CBP Block-1 Operation and Maintenance, Integrated Fixed Towers, and Remote Video Surveillance System.

ISCO International specializes in protecting wireless networks from harm by dynamically detecting and mitigating interference, removing unwanted noise and intrusive signals and maximizing the amount of spectrum capacity that is clean and available for handling traffic. Our equipment is deployed in Tier 1 wireless carrier networks in macro sites and DAS systems throughout the United States. Other capabilities include precise filtering to prevent jamming and problems from out-of-band emissions, along with tools to remotely analyze spectrum real-time and identify interference characteristics to assist in hunting interference sources.

Jesse Ward

Industry & Policy Analysis Manager

jward@ntca.org

7033512007

NTCA–The Rural Broadband Association is the premier association representing nearly 900 independent telecommunications companies that are leading innovation in rural and small-town America. NTCA members deploy robust wired and wireless networks to serve the most sparsely populated and remotely located areas of our country. As such, NTCA’s members have valuable assets in rural areas that may be of particular interest to FirstNet and its mission, including transport connections, copper and fiber infrastructure, high-capacity wireless backhaul, utility poles, wireless networks and towers, rights-of-ways, data centers, and other operational and technical resources.

SBA Communications Corporation (SBA) is a leading independent owner and operator of wireless communications infrastructure across North America. SBA's two primary businesses are site leasing and site development services. Just recently, SBA crossed the 25,000 towers threshold between their domestic and international portfolios. SBA looks to partner with offerers seeking to provide top quality tower facilities through our in house site development and construction services. We also have the advantage of supplementing typical tower infrastructure with roof top management and small cell build out.
