FirstNet and Emergency Medical Service Providers

Announcer: For the emergency medical technician in the field – information is power. Your patients depend on you to deliver the best pre-hospital care.

You need access to reliable communications at all times to coordinate with other first responders at the scene and with medical personnel at the hospital.

The First Responder Network Authority (FirstNet) is building a broadband communications network that will give you the connectivity you need for the wireless telemedicine support of community paramedicine.

FirstNet will put the most advanced technology at your fingertips. It will give EMS providers a reliable broadband connection that will enable them to transmit and receive life-saving medical information.

FirstNet connects you to your partners in other jurisdictions.

Whether communicating during a multi-agency incident, or sending videos or photos of injured or sick patients to doctors waiting to treat them, FirstNet will bring emergency responders together in an unprecedented way.

First Responders need the very best tools we can put in their hands. First responders need FirstNet.
